

ECONOMY + ECOLOGY = labour savings + less water/detergents!

asc®

ASC Eureka E51

The E51 is a professional walk-behind scrubber-dryer, ideal for the thorough cleaning of areas ranging between 250 sq/mt and 1000 sq/mt. It has a cleaning width of either 510 mm or 530 mm which, combined to a 4 km/h speed, boasts an area coverage of 2.120 sq/ m/h. The ECO configuration is equipped with the new, exclusive ECO system (patented), which breaks water economy and detergent saving barriers, and has won several awards (among them, the Veneto Sviluppo award issued by the University of Padua). The system has been designed to guarantee impressive labour/water/detergent savings, and boasts a productivity rate between 3 and 5 times greater than traditional systems

Characteristics

The E51 is available equipped with the following type of batteries:

2 x 12V Gel batteries

2 x 12V standard batteries

Furthermore, the machine is supplied with a comfortable, easy to use on-board battery charger.

The frame is rugged, made of durable, thick steel, sanded, coated with zinc-phosphate and treated with a thermo hardening powder. Advantage: Better durability (3 times longer than a chassis treated with a standard method)

ASC Eureka's scrubbers feature a fixed brush pressure of 25 kg. For that reason, the machine can work on smooth floors (i.e. where no abrasive action is required) as well as on rough surfaces without overloading the motor.

Designed around ASC Eureka's ECO technology, this model can be supplied with the exclusive ECO system.

Designed for use in:

- ✓ **Industrial sites**
- ✓ **Communities and vicinities**
- ✓ **Schools & Offices**
- ✓ **Religious buildings**
- ✓ **Hospitals**
- ✓ **Public buildings & Logistical depots**
